flex series

architectural walls

the sustainable solution

Infinitely flexible work environments

Our FleX Series fits the needs of your workspace, both today and tomorrow. We provide flexibility for your evolving business and culture. Our commitment to create spaces with uncompromising aesthetics, meet challenging budgets, and provide environmental accountability keeps NxtWall's FleX Series in high demand.

As your business and work culture evolve, so must your interior spaces. Nxtwall's FleX product design allows for ease of change in heights and finishes from use to reuse. Wall finishes are easily switched from solid to glass with minimum interruption to your workday. The technology consists of removable elements that allow for easy access to both infrastructure and work spaces.

Break out of the molded cubicle! With a FleX wall system, choose standard materials such as glass or white boards, or use original materials to create unique environments. Insert recycled wood pallets, corrugated metal, stained glass... any material 1/2 inch nominal thickness can be used to customize your wall to suit.

Detailing

- Extensive selection of finished panels
- Unlimited choice of modulations
- Ability to meet curvilinear floor plans
- Unlimited finish options

Flexibility

- Ability to accommodate any design layout
- Ease of change in wall materials used (gypsum, glass, MDF, etc.)
- Reversible doors and door frames
- Height adjustable

Sustainability

- Supports LEED building design
- Reusable, re-configurable
- 100% recyclable
- Supports Daylight Harvesting

Integrated Design

- Compressive and scalable
- Integrates with existing construction
- Use as a complete solution
- Supports difficult building environments

Functionality

- STC 43 with Vinyl Wrapped Gypsum Panel
- STC 42 with Double Pane Glass
- Integrate White Boards and Electronics
