

COVID-19 Social Distancing the NxtWall Way

NxtWall Demountable walls are a quick and easy way to reconfigure open spaces into private offices where worker safety can be ensured, and strict sanitation measures can be maintained. Both NxtWall's Flex and View Series demountable walls made from glass and/or vinyl wrapped gypsum are non-porous and easy to clean with surface cleaners and wipes. Gone are the open office bench seating layouts with countless people in close proximity.

7 ways NxtWall can ensure social distancing and employee safety within the "new" normal work environment:

1. Glass Private Offices

NxtWall's View Series can provide seamless glass private offices with sliding glass doors. Personal workspace with cleanable non-porous hard surfaces.

2. Glass Sliding Windows

Install a functional and attractive glass barrier between your receptionist and walk-ins with NxtWall's Flex Series glass sliding window kit. Easy to clean and sanitize with disinfectant sprays and wipes.

3. NxtProtect - Protective Glass Screens

NxtWall's protective glass screen product line, NxtProtect, is a quick and easy solution to convert workspaces into a safer work environment by reducing the spread of germs from face-to-face interactions. Non-permanent installation, customizable to fit your workspace, and optional Speak-Thru available.

4. Flex Series Dividing Walls

Social Distance measures are in effect. Therefore, dividing walls are the perfect way to prevent unwanted crowding. Using the Flex Series demising walls, both the glass and vinyl wrapped gypsum can be cleaned regularly to prevent the spread of germs.

5. Customizable Individual Workspaces

Compartmentalize your workspace with Flex Series dividing walls and create necessary space by incorporating transaction tops for customers. NxtWall offers anti-microbial and anti-bacterial laminate options for your employee and customer's safety.

6. NxtWall Quick Ship Program

NxtWall can provide private offices quickly with our new quick ship program which allows orders using stock finishes, doors, door hardware, wall board, and glass to be shipped complete and ready to install – in as little as 7 days! NxtWall's Quick Ship program is both innovative and easy to use. Installation can be completed in as little as a day depending on size of office chosen.

7. Patient Privacy

NxtWall Flex Series can also be used for medical and testing facilities to ensure patient privacy. Use NxtWall's anti-microbial and anti-bacterial laminate options to ensure a sanitized environment for patient safety.
