

### Jaquish Biomedical Corporation - Nevada City, CA

*"After much researching we elected to go with NxtWall because of their extensive fabric and finish offerings. As a result, we were able to match our previously installed décor with something very similar and complimentary. NxtWall was incredibly helpful throughout the entire process: from ordering samples to product delivery and install, everything went smoothly despite our difficult scheduling needs. The end result is gorgeous, and we couldn't be happier! Thank you!"*

**– Chelsea Wadsworth, Jaquish Biomedical**

#### **Project Profile:**

Jaquish Biomedical is a research and development group that applies new findings in human physiology to physical medicine and rehabilitation device design. This results in cutting edge solutions for advanced health. The Osteostrong Devices and X3 System were invented by John Jaquish, who started Jaquish Biomedical in 2009.

#### **Challenge:**

Jaquish Biomedical needed more space and rather than go with conventional drywall they decided to install demountable walls that were flexible, functional, and attractive. They needed a wall system that would create four private offices and closely match their existing cubicles in both color and style. Timing was essential. Jaquish Biomedical wanted a quality product at a competitive price that would be delivered and installed quickly.

### Jaquish Biomedical Corporation - Nevada City, CA

#### Solution:

NxtWall Architectural Wall Systems are custom built, exceptionally flexible, and easy to adapt to customer's needs. Jaquish Biomedical chose NxtWall because NxtWall demountable walls offer unlimited opportunities to create the perfect adaptable environment. NxtWall's carefully chosen selection of vinyl, fabric and laminate finishes makes it easy to match an existing design. NxtWall also provides a more streamlined installation process. Only a single trade is needed to install NxtWall from start to finish, as opposed to the extended schedules and multiple trades that are necessary for standard construction methods. This is particularly important in today's economic environment where labor shortages are prevalent.

#### PROJECT INFO:

**Client:** Jaquish Biomedical Corporation

**Photographer:** Chelsea Wadsworth
