

Nxtwall Glass Strap Instructions:

****Please Note: The Glass Strap is used to safely install the glass on all View Series projects. The use of the Glass Strap is REQUIRED on all View Series projects****

Instructions for Use:

1. Loosen the strap to allow enough length to hook into the top and bottom View Track. To loosen the strap, press the release button on the buckle.
2. Place the hooks into the channel of the View Track as shown in the illustration. Place the strap into the section of the opening where the glass is being installed.
3. Pull the loose end of the strap to pull the strap tight.
4. For the next pane of glass loosen the strap and slide the strap to the next glass location within the opening.

Please Note: Do not overtighten the strap. The purpose of the strap is to keep the top and bottom View Track from separating during the installation of the glass.
